---

**INTA Technologies Corporation is the solution!**  
Our loyal customers are obtaining high quality gold  
Plated parts by utilizing our “bulletproof” plating process.

Cu/W, Thermkon

Copper-Beryllium

CM-15, Copper Moly

## Why Use INTA Technologies Corporation?

- **Lower Cost**, a result of high yields. Plating thickness is XRF verified and heat tested at 425°C.
- **One Stop Shopping**, INTA Technologies Corporation provides complete components including material, machining and plating.
- **Quick-Turn** capability is available to meet critical delivery requirements.
- **Exotic Materials** can be plated using materials that are in stock including Thermkon (Copper Tungsten) and CM-15 (Copper Moly).
- **Guaranteed** satisfaction, we stand behind our plating and machining quality.
- **Complete Rework** or repair capability on our competitors' plating which your company has rejected.
- **Environmental** regulations are strictly adhered to. A closed loop rinse system is used which complies with all Federal, State and Local waste management requirements.
- **ISO 9001:2008 Certified** means quality.
